

「Leisure time – creating
unforgettable adventures」

「Welcome to eibe.」

FAMILY TIME, BEST TIME!

Whether it's a day trip or a family vacation, taking time out together away from the daily grind – family time is precious time.

In order for a perfect family day to succeed and become an unforgettable experience, a family-friendly destination is needed where everyone can have a relaxed, enjoyable time. A place where the whole family can have fun is measured first and foremost by what is on offer for younger visitors. That's why the youngest members of the family usually have a say when it comes to choosing a destination. Any excursion with children is only as good as the play facilities available.

Children love adventure playgrounds. What could be better than watching your own kids create their play and be happy doing it? Whether it's a recreational facility, a park, an indoor playground or the small, fine places with that special something – in the garden pub, hotel or at the campsite. They all provide a lot of happiness and unforgettable memories. This is where guests love to come back.

The exciting adventure play areas and imaginative themed play facilities from eibe – for outdoors and indoors are a guarantee for carefree fun, offer challenges, ensure movement and thus happy children and satisfied, relaxed parents.

In the selection of materials, as well as in the production and processing of our eibe play worlds, we pay attention to ecological sustainability and environmental friendliness. Playground equipment in the recreational area is highly frequented and must therefore withstand a high load, be stable and durable.

eibe playgrounds are made of high quality wood. Constructive wood protection, fastenings made of stainless steel and other high-quality materials guarantee robustness, first-class stability and safety.

As a specialist for individual play worlds, we can fully respond to the special conditions of your site, plan and manufacture to measure.

We know the trends, plan individually and build your playground highlight for the family leisure area sustainably and value stable.

A low-angle photograph of three children playing on a large tree trunk in a forest. A girl in a pink shirt is on the left, a boy in a white shirt is in the center, and a girl in a white shirt is on the right with her arm raised. The background is filled with tall trees and a bright sky.

Sustainability & Environment.

SUSTAINABILITY, ENVIRONMENTAL PROTECTION, ECOLOGICAL BALANCE

eibe is a true “environmental protection pioneer”. It is important to us as a company that all products are manufactured as sustainably and environmentally friendly as possible. From wood as a raw material to the production process and catalogue printing: we work in a resource-saving manner, pay attention to fairly produced materials and attach great importance to the highest level of transparency in all areas.

We have made it our mission to motivate children to be more active. This is best achieved with well thought-out play concepts, the sensible integration of new trends and natural, exciting materials. That’s why we rely on wood – and thus on one of the most versatile and sustainable materials!

Wood is also hard to beat in terms of look and haptics.

As a building material, wood is characterised above all by its long service life and low maintenance requirements. eibe play equipment is produced using ecologically compatible manufacturing processes.

- Only wood from European forestry is used for our play equipment, which is 100% FSC®-COC certified.
- Saving energy costs and reducing emissions through heat recovery and direct air supply.
- Residual wood, chips and sanding dust are transported centrally to the storage silos and from there to the company’s own heating system. In this way, more than 90 % of the heating requirements of the entire company are covered.
- Use of resistant woods for outdoor use, chrome-free impregnation according to DIN regulations.
- Increase in work efficiency due to shorter transport routes.
- Investment in forklifts with air filters to keep the air in the halls clean.
- Conversion of forklifts from diesel drive to electric drive.
- Replacement of the lights in the production halls and warehouses with LED lights.

NATURE AND THE ENVIRONMENT – MAXIMUM PRIORITY FOR A GOOD FUTURE

For more than 20 years, it has been a matter close to our hearts to manufacture play equipment and play facilities as environmentally friendly and sustainable as possible. That's why we use environmentally friendly and ecologically sound materials for our products and only use raw materials that are free of harmful substances. As former carpenters, we are real wood experts! We know the value of this raw material and are familiar with strict processing criteria.

Wood is one of the best raw materials of all when it comes to CO₂ neutrality and resource conservation. The harmful greenhouse gas carbon dioxide (CO₂), which every tree extracts from the atmosphere during its growth phase, is harmlessly bound as carbon (C) in wooden products over their entire service life. eibe play equipment made of wood thus acts like a CO₂ battery over its entire product life cycle.

We use wood mainly in the form of sawn timber, squared timber or round timber. Larch laminated timber is particularly convincing with its natural durability, as is robinia wood, which can be installed outdoors without any treatment due to its resistance. We carry out long-term tests on our products and are actively involved in the DIN/EN standards committee – after all, environmental protection starts with product development!

OUR CERTIFICATIONS

OUR MEMBERSHIPS

THE IDEAL PARTNER WHEN IT COMES TO SAFETY.

It is not for nothing that our products are produced in Germany and put through their paces before they are released for use.

Our products are certified and meet all the required EU standards. After all, the safety of our children is also in our hands.

That makes us reliable:

- For decades, we have been happy to be personally on site for you.
- Careful project management and proactive communication.
- We implement our customers' wishes within budget and conscientiously.
- Defined and regularly certified quality standards according to ISO 9001.

made in
Germany

All our play units
comply with the
DIN EN 1176
and
DIN EN 16630
standards.

「The eibe allround service」

QUALITY IN PRODUCTS, PERFORMANCE AND ADVICE.

eibe offers professional all-round service from planning to installation. Your wishes are implemented by specialists in creative complete concepts. Together with you we fix project stages and determine costs. Play value, attractiveness, educational demands are just as important planning factors as durability, safety and ecological sustainability. We at eibe are a competent partner – even if special site-specific requirements or special target groups have to be taken into account.

We offer you full service: from A to Z, internationally and with globally active partners directly on site:

- Personal expert advice
- Individual and creative concept development
- Well thought-out playground planning according to international guidelines
- Professional project management and on-time realisation
- Tailor-made financing according to your needs

「Indoor adventures!」

Holiday Park RCN de Schotsman, NL

Airport Nuremberg, GER

Modularity without limits – individual combinations!

Customised standard unit or a complete new play world – we compose your individual play unit!

We check your bespoke combination on technical feasibility and stability, standard conformity, delivery time and price.

So we can guarantee the perfect construction process for your playground project.

You would like to replace the mountaineering ramp, choose your favourite ascent from a wide selection!

Choose from different themed worlds:

- Maritime → Construction Site
- Jungle → Farm
- Fire brigade → Castle

You want to replace the obstacle?
 You are spoilt for choice:
 how about a buoy or a beanbag?
